Organon Canada and the Alberta Women's Health Foundation unite to raise awareness and advocate for universal access to contraception in Canada

This World Contraception Day, organizations partner to raise awareness of the need to reduce barriers to contraception and invite others to support universal access

KIRKLAND, QC and EDMONTON, AB — September 26, 2024 – In recognition of World Contraception Day (WCD) on September 26, Organon Canada, a subsidiary of Organon (NYSE: OGN), a global healthcare company with a focus on women's health, and the Alberta Women's Health Foundation (AWHF), a pan-provincial fundraising brand supporting the advancement of care and research in women's health, are collaborating to show their support for universal access to contraception in Canada.

Organon and AWHF are encouraging people in Canada to advocate for themselves and the women in their lives by asking their local elected officials to support universal access to contraception and the creation of a national women's health strategy, and to support women's health research aimed at improving outcomes and removing gaps in knowledge.

Nearly 50 per cent of pregnancies are unintended in Canada¹, which can lead to negative impacts on mental health, cause individuals to be unprepared to become parents² and have significant costs to health systems.³ Universal access to contraception is key to addressing these challenges, including reducing healthcare costs,³ decreasing the gender pay gap² and the empowerment of women and people who can get pregnant.⁴

"World Contraception Day serves as a powerful reminder of the importance of ensuring universal access to contraception for all those who need it. At the Alberta Women's Health Foundation, we are proud to collaborate with organizations like Organon Canada to draw attention to this essential issue and to advance our shared goal of removing barriers," declares Sharlene Rutherford, President and Chief Executive Officer at the Alberta Women's Health Foundation. "By raising awareness and supporting critical research, our goal is to ensure every woman can make informed choices about her health and her future."

Affordability can be a significant barrier to access to contraception for many people across Canada, falling particularly on women and people who can get pregnant.⁵ While progress has been made in provinces like British Columbia⁶ and Manitoba⁷, along with support from federal policymakers, further advocacy is needed to break down barriers to contraception access for all Canadians.

“Sixty years ago, access to contraception started a change in reducing certain gender inequalities in the workplace as women were empowered to plan their careers,”⁸ says Michael Casia, President and Managing Director at Organon Canada. “At Organon Canada, we advocate for a future where gender equity in the workplace is the industry standard and just last year, we proudly declared our support for universal access to contraception.⁹ Now, we’re continuing to build on this momentum through our collaboration with AWHF to encourage industry-wide movement on the issue.”

“Contraceptives are more than a tool for family planning or preventing pregnancy—they are essential components of healthcare for women,” says Dr. Donna Vine, Women and Children’s Health Research Institute (WCHRI) researcher, University of Alberta Professor, and founder of *PCOS Together*. “For women with conditions like PCOS, they alleviate menstrual and hormonal symptoms that impact day to day life and offers control over their health and well-being. Universal access to contraceptives isn't just about choice; it's about ensuring that every woman, regardless of her circumstances, can access the health care she needs. It's time to remove the barriers to access and recognize that contraceptives are essential in women's health.”

With the financial support of Organon Canada, the Alberta Women’s Health Foundation is launching a survey to gather key insights on women’s behaviours, attitudes and challenges around contraception, from teenage years to post-menopause that will inform policy development.

If you live in Alberta, advocate for yourself and the women in your life by signing up to learn more and potentially participate in the AWHF’s upcoming survey by visiting <https://www.albertawomenshealthfoundation.org/contraception-survey>.

About the Alberta Women’s Health Foundation

Alberta Women's Health Foundation (AWHF) is a pan-provincial fundraising brand supporting the advancement of care and research in women's health. The AWHF was launched by the Royal Alexandra Hospital Foundation in 2020 as an extension of its mission in women’s health. This charitable health brand seeks to meet the increasing need for funding related to women’s health initiatives and seeks to close gaps that exist in women’s health knowledge, research, and care through the development of meaningful partnerships across public, private, and philanthropic sectors.
