

Julie Pentz

Chief Procurement Officer

As Head of the Global Procurement & Supplier Management (GPSM) organization, Julie is responsible for implementing robust supply relationship management to ensure delivery, optimize the supplier base, and drive on-going value across Organon. She guides GPSM partnerships with stakeholders at the global, regional, and local levels to design strategies that deliver year on year value, manage risk, and support Organon's evolving long-term business goals.

Julie brings nearly 25 years of cross-functional pharmaceutical experience in strategy development, execution, and performance management across research, supply chain, logistics, and internal and external manufacturing at Merck, known as MSD outside the U.S., and Organon.

Julie has a B.S. in chemical engineering and an M.S. in management science from Lehigh University.

About Organon Organon is a global healthcare company formed to focus on improving the health of women throughout their lives. Organon offers more than 60 medicines and products in women's health in addition to a growing biosimilars business and a large franchise of established medicines across a range of therapeutic areas. Organon's existing products produce strong cash flows that support investments in innovation and future growth opportunities in women's health and biosimilars. In addition, Organon is pursuing opportunities to collaborate with biopharmaceutical innovators looking to commercialize their products by leveraging its scale and presence in fast growing international markets.

Organon has a global footprint with significant scale and geographic reach, world-class commercial capabilities, and approximately 10,000 employees with headquarters located in Jersey City, New Jersey.
