

Michael Pergine

Chief Government Affairs & Policy Officer

As a founding executive of Organon, Michael directs global strategic policy-shaping efforts across the full portfolio of franchises. He leads U.S. and International government affairs activities, and engages in Organon's comprehensive ESG program with a focus on access to medicine.

Prior to joining Organon, Michael spent 25 years at Merck, known as MSD outside the U.S., where he led the global strategy and operations for the HPV vaccine franchise. In addition, he engaged in product development activities for multiple assets, managed global supply chains, led vaccine business development and alliance management activities, oversaw strategic planning efforts across an integrated R&D, manufacturing & supply and commercial vaccine enterprise, and represented the company to government officials around the world. Previously, he was a Senior Consultant at both Ernst & Young and BDM Technologies, where he engaged with multiple global companies across several continents, in various industry sectors.

Michael has a B.S. in logistics from Penn State University and additional executive education certifications from the Wharton School, Duke University (Fuqua School of Business), Harvard Business School Executive Education, and Georgetown University McCourt School of Public Policy. He is on the Board of the US-ASEAN Business Council (Nominating Committee) and the Board of the National Center for APEC (Executive Committee).

About Organon Organon is a global healthcare company formed to focus on improving the health of women throughout their lives. Organon offers more than 60 medicines and products in women's health in addition to a growing biosimilars business and a large franchise of established medicines across a range of therapeutic areas. Organon's existing products produce strong cash flows that support investments in innovation and future growth opportunities in women's health and biosimilars. In addition, Organon is pursuing opportunities to collaborate with biopharmaceutical innovators looking to commercialize their products by leveraging its scale and presence in fast growing international markets.

Organon has a global footprint with significant scale and geographic reach, world-class commercial capabilities, and approximately 10,000 employees with headquarters located in Jersey City, New Jersey.
