

## **Juliana Papa Drinane**

Head of Supply Chain Management

Juliana is responsible for delivering value throughout Organon's global supply chain network including value chain design, planning, and delivery to patients in the 140 markets served. In her role, she provides her strategic vision and operational acumen to business development and other commercial opportunities in support of Organon's in-organic and organic growth aspirations. In connection with Organon's spinoff from Merck & Co., she served as a functional lead responsible for all aspects of design, separation, and stand-up of Organon's Manufacturing & Supply organizations.

Prior to Organon, Juliana spent 28 years of her career in various leadership roles at Merck, known as MSD outside the U.S. She spent 14 of her 28 years at Merck working part-time in a successful job-share arrangement. She demonstrated and was a role model for alternative ways of working to balance family and career ambitions. Juliana began her Merck career as a Process Engineer and progressed through roles in engineering, capital projects, technical operations, and supply chain.

Juliana has a B.S. in chemical engineering from Lafayette College. She volunteers her time with a N.J. based non-profit, America's Grow A Row, where she has been a Board member since 2013 and has served as Board Chair since 2018.

**About Organon** Organon is a global healthcare company formed to focus on improving the health of women throughout their lives. Organon offers more than 60 medicines and products in women's health in addition to a growing biosimilars business and a large franchise of established medicines across a range of therapeutic areas. Organon's existing products produce strong cash flows that support investments in innovation and future growth opportunities in women's health and biosimilars. In addition, Organon is pursuing opportunities to collaborate with biopharmaceutical innovators looking to commercialize their products by leveraging its scale and presence in fast growing international markets.

Organon has a global footprint with significant scale and geographic reach, world-class commercial capabilities, and approximately 10,000 employees with headquarters located in Jersey City, New Jersey.
